

GPS TRACKER USER MANUAL

PREFACE

Thank you for purchasing GPS tracker. This manual shows how to operate the device smoothly in details, please make sure to read this manual carefully before using the device. Please be noted that any update of the manual is made without prior notice. Each time the update of the manual will be released in the latest product sales. The manufacturer won't assume any legal responsibility for any errors or omissions made in this manual.

1 SUMMARY

Working based on existing GSM/GPRS network and GPS satellites, this product can locate and monitor any remote targets by SMS, APP and Internet. It adopts the most advanced technology of GPS and AGPS dual positioning.

Content	Specs.
Dim.	95*50*13mm
Weight	65g
Network	GSM/GPRS
Band	850/900/1800/1900Mhz
GPS sensitivity	-159dBm
GPS accuracy	5m
Wall charger	12V-36v
Time To First Fix	Cold status 45s Warm status 35s Hot status 1s
Storage Temp.	-40°C to +85°C
Operation Temp.	-20°C to +55°C
Humidity	5%--95% non-condensing

2. Hardware Description

2.1) device front side towards the sky. When install in car, if the windscreen glued by metal thermal insulation layer or heating layer, it will reduce the GPS receive signal and lead to GPS work disorder.

(The GPS tracker must be installed professional personnel)

2.2 Wires connection

2.2 device power wire connection as below:

2.2.1 Red wire connects to vehicle power positive +

2.2.2 Black wire connects to vehicle power negative -

2.2.3 Yellow wire connects to relay yellow wire

2.2.4 Green wire connects to ACC wire

2.2.5 thin Red wire connects to the door control circuit if it is positive

2.2.6 thin black wire connects to the door control circuit if it is negative

Knowing about the type of the door trigger is positive or negative trigger

2.3 Device wiring diagram

INDICATOR LIGHT STATUS	MEANING
green light -Solid	GSM signal connection
green light -Flash	NO GSM connection
Blue light -Solid	GPS signal connection
Blue light -Flash	No GPS or searching gps signal

Note: All ledS will turn off after 5 minutes for best hide

Connect 12V-36 v voltage of the power supply

3. Main functions

- GSM quad-band frequency;
- Real time tracking by SMS/GPRS;
- Recover original password;
- Real time voice monitoring;
- Overspeed alarm ;
- ACC anti-theft alarm ;

- SOS alarm ;
- Built-in backup battery to realize power failure alarm;
- Cut vehicle oil or circuit (optional).
- Add Open the door alarm;
- Add Vibration alarm
- Add Smart sleep save power Mode

4. Notices:

- 1.GPS tracking can be worked outdoor.
- 2.Please make sure GSM SIM card(2G GSM network or compatibility 2G GSM network) supports making calls, sending messages, GPRS network.
- 3.Please make sure GSM SIM card is with sufficient balance.
- 4.Please make sure the GSM card has opened the call shows and turned off the call transfer.
- 5.Please insert the GSM phone card correctly.
- 6.Do not assembly and disassembly device at will.

5.TURN ON THE DEVICE

- Open the back cover, insert the SIM card(chip up) to the slot.
- The indicator light is on when SIM card is inserted.

- The device gets GPS location when there is GPS signal and gets LBS location when there is no GPS signal.
- The device automatically turns off when the SIM card is removed.

6.SMS TRACKING(123456 is default password)

6.1. insert the SIM card, take device to outdoor

6.2. tracker

Call the SIM card phone number in tracker,you will receive a Google Maps link of position after set up the authorization number or sending message “[smslink123456](#)” to SIM card phone number in tracker .

E.g:

6.3. Admin number setting support 5pcs admin number (After admin number setting, all SMS alarm will send the admin number.)

Command: [admin123456 phone number](#) (This phone number is your own mobile phone number , not the SIM card number in tracker .)

Reply: [admin ok](#)

E.g: [admin123456 13800138000](#)

When the unit is in over-speed alarm,move alarm it will send alert to the admin

number. (13800138000)

Admin number Canceling:

Command : [noadmin123456 13800138000](#)

Reply: [noadmin ok](#)

6.4 Monitor

6.4.1 The default mode is “tracker” (Tracker mode).

6.4.2 Send SMS “[monitor+password](#)” to the unit, switch to “monitor” mode. then use your mobile call the device sim card, unit will auto pick up

6.4.3 Cancel monitor Send SMS “[tracker+password](#)” to the unit, switch to “tracker” mode

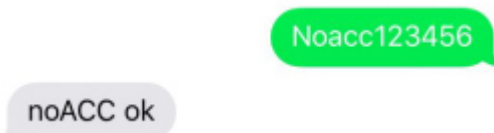

6.5 ACC working alarm

6.5.1 This function is deactivated by default. send "[ACC+password](#)" to tracker, And tracker will send "ACC on+latitude & longitude" to authorized numbers when detect ignition on\; and tracker will send “ACC off+latitude & longitude" to authorized numbers when ignition off and ACC is off.

E.g:

6.5.2 Send "[noacc+password](#)" to deactivate this function, tracker will reply "noACC ok".

6.6 Cut off the Oil and Power System

6.6.1 Send command “[cut+password](#)” to tracker, And it will remain immobile state until next command to resume. it will be executed , and stop the car when the speed is less than 20KM/H.

6.6.2 resume the Oil and Power System

Send “[resume+password](#)” to tracker,

6.7 Power failure alarm

6.7.1. This function activates by default. it will send alarm after the extral power discount

```
cut power alert!  
352887077654321  
17-04-18 13:30:10  
22.675139,N,114.039073,E  
http://maps.google.com/maps?  
q=N22.675139,E114.039073
```

6.8 SOS help

Long Press the SOS button for 3 seconds, the tracker device will send SMS “SOS HELP!+lat./long.” to all the authorized numbers

```
SOS help!  
352887077654321  
17-04-18 10:44:03  
22.674697,N,  
114.038577,E
```

9 Vibration alarm (built-in g-sensor)

Send “[shock+password+space+level](#)” to the unit(level from 1 to 5,1 is the highest sensitive),when the sensor is striggered ,and will send send Vibrate alarm+latitude&longitude”,

6.9.1

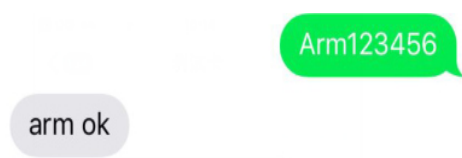

6.9.2 canceling: Send SMS “[noshock+password](#)”

7. Arm set

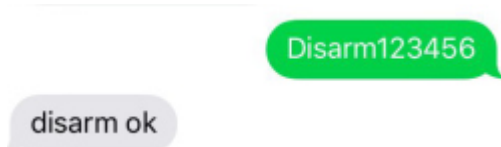

7.1.1 Send SMS command “[arm+password](#)” to the tracker. the SMS command will make the tracker device enter into armed state,User must stop the engine, (that is ACC is lower voltage),You will set up arm status fail if the engine is turned on (the ACC is high voltage), it will reply “set up fail! pls turn off ACC”

Disarm

7.1.2 Disarm by SMS

Send SMS command "**disarm + password**" to the tracker device, and the SMS command will make the tracker device enter into disarmed state.

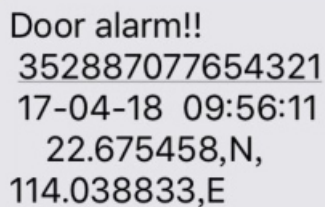

Alarms under Arm State

7.1.2 Door open alarm

The unit will send SMS "Door alarm+lat/long" to the authorized number at interval of every 3 minutes when the door of the car always open in arm status.

Close the door of the car or Disarm to stop this alarm

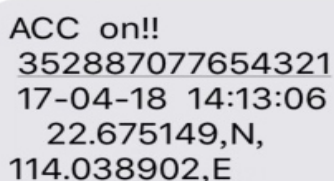

A screenshot of an SMS message in a grey bubble. The text reads: "Door alarm!!", followed by the phone number "352887077654321", the timestamp "17-04-18 09:56:11", and the coordinates "22.675458,N, 114.038833,E".

17-04-18 09:56:11
22.675458,N,
114.038833,E

7.1.3 ACC Alarm

The unit will send SMS "ACC on+lat/long" to the authorized number in at interval of every 3 minutes when the engine of the car is always turned on in arm status

Close the ACC off or Disarm to stop this alarm

A screenshot of an SMS message in a grey bubble. The text reads: "ACC on!!", followed by the phone number "352887077654321", the timestamp "17-04-18 14:13:06", and the coordinates "22.675149,N, 114.038902,E".

ACC on!!
352887077654321
17-04-18 14:13:06
22.675149,N,
114.038902,E

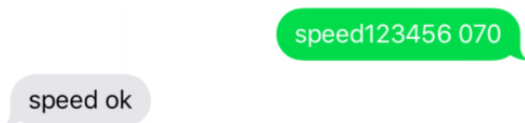

7.2 Over-speed Alarm setting (It works only in continuous positioning mode.)

Over-speed Alarm setting:

Command : `speed123456 70` (Suppose speed is 70km/h) note: not less 60KM/H

Reply: `speed ok`

E.g:

When the unit speed is over 70km/h, it will send message “speed alarm!” to the admin number .

Over-speed Alarm canceling :

Command : `nospeed123456`

Reply: `nospeed ok`

7.3. move Alarm setting (It works only in getting gps signal, the scope is a circle that radius 200meters)

Command: `move123456`

Message Reply: `move ok`

E.g

move alarm Canceling:

Command: `nomove123456`

Reply: `nomove ok`

7.4 Terminal (local) Time Setting(factory setting GMT 0)

Command: `time zone123456 local time zone`

Reply: `time ok!`

E.g: `time zone123456 1` `time zone123456 -1` `Time zone123456 0`
`time zone123456 5 30`

7.5 Reset Hardware

Command: `reset123456`

Reply: `reset ok`

7.6 Change the password

Command: `password123456 888888`

Reply :`password OK`

Note: 123456 is the old password(default),888888 is the new password,it must the 6 digits Arabic numerals

7.8 Smart sleep save power Mode

	SMS Mode(close GPRS)	GPRS Mode
Normal mode(default)	gps module work all the time	Online ,the device will send gps data all the time though the car is static or moveing
Smart Sleep mode	The device static,it go to sleep, GPS module shut off, GSM module work in low power consumption. The car move , call	Always online,once car is static , GPS module shut off, GSM module work in low power consumption. once the car moveing,device get shock ,it will auto wake up and send gps data to platform server

	and sms command can awake it.	
--	----------------------------------	--

7.8.1 send “sleepin+password”

7.8.2 Cancel: Send “sleepout+password”, tracker will reply “sleepout ok”, tracker won’t sleep, GSM and GPS works all the time.

7.8.3 switch GPRS to SMS mode (SMS mode means close the GPRS)

The default mode is “GPRS”, Send SMS “**sms+password**” to the tracker, and it will reply “sms ok!” enter sms mode

Send SMS “gprs+password” to the tracker, and it will reply “gprs ok!” enter GPRS mode
